

Bus Video Receiver (BVE 650-0)

This bus video receiver is used for the conversion of video and control signals and for the power supply from the 2-wire bus to the monitor.

The BVE650-0 is mounted in a row on the left hand side of the monitor (MOM/MOC/MOCT 711-...). This surface mounted module may be used as a flush mounted or desk-top unit with the relevant accessories.

Terminals for user bus cores as well as external monitor supply.

Specifications

Operating voltage	20 – 30 V DC
Current consumption	100 mA plus monitor
Temperature range	0° to +40° C
Protection system	IP 20
Dimensions	3.5" x 9" x 1.4"
